Dylan James Evans

College Station, TX | dylan.evans00@tamu.edu | (480)-490-3813 | www.linkedin.com/in/dylan-evans00

OBJECTIVE: Seeking a summer 2025 mechanical engineering internship that makes a real world impact and foster a work learning environment to further my knowledge.

EDUCATION

Texas A&M University | College Station, Texas **May 2030** *Bachelor of Science in Mechanical Engineering* GPA: 3.50

Austin Community College | Austin, Texas **August 2026-Present** *Texas A&M Engineering Academy Associate's of Science* GPA: 3.50 ● Python, Engineering Basics, and high level math.

Georgetown High School | Georgetown, Texas **May 2026 EXPERIENCE**

Goldbird Enterprise | Georgetown, Texas **May 2022 – Present** *Busser/Runner*

- Committed to provide a unique and enjoyable experience at Camp Briteside.
- Learning how to work in groups of people caused an overall substantial increase in tips across a group of people. ● Conversing well in social settings and thrives in face to face contact with customers.

ACTIVITIES & AWARDS

Students for the Exploration and Development of Space | Austin, Texas

ACC SEDS

- An international student organization whose purpose is to promote space exploration and development through educational and engineering projects.
- Getting a L1 certification and working in a group of smart people.

Rocketry Club at Georgetown Highschool | Georgetown, Texas **May 2023** *Systemsgo Rocketry*

- Designed a L1 Certification earning rocket in high school in a group of three, reached speeds up to 420 mph and went a mile high but unfortunately had an issue with the altimeter.

SKILLS

- *Programming*: Python
- *Software*: CAD, Revit, Fusion360, Microsoft Office (Word, Excel, PowerPoint), Google Drive
- *Language*: English (native), Spanish (Superficial)
- *Certifications*: Revit Certified, and Linked In learner certified.
- *Tools*: Dial calipers, power tools, multimeters, soldering, laser cutting, 3D printing.
- *Interests*: MEP Revit design, Coding with real world application, and robots/arduino based projects.

LEADERSHIP

- Elected student council president in High school leading our group to earn over 23,500$ and creating a club to gain members. ● Won a gold National council of excellence award, and numerous state sweepstakes awards
- Engaged in a multitude of volunteering opportunities across a span of three years.

PROJECTS

CAR RESTORATION PROJECT | May 2023

- Repaired the cooling system and headlights, including wiring and soldering. Repainted the front hood — sanding, priming, and finishing work with a friend.
- Wired a complete new sound system, including door speakers and a 12" subwoofer. Saving roughly 2000$ self repairing, and building a reliable daily driver.

FILAMENT WINDER PROJECT | Sept 2026

- Worked in a team of 20 people to create a filament winder that wraps carbon tow around a surface coating it in epoxy and turning it into a rocketry body tube that’s efficient and light weight.
- Apart of the mechanical, electrical teams and used cad design to design the file before making it open source by the end of my freshman year. It saves the club on average 3000$ being able to create about 8 tubes with 400$ worth of materials.
